EXPERIENCE

Ontario Power Generation (OPG) - [opg.com](#)

May 2026 - Aug. 2026

Cybersecurity Consultant

Oshawa, ON

- Conduct third-party vendor risk assessments (TPRM) for prospective tooling, evaluating data classification, access controls, and security posture to identify and document organizational risk.
- Developed a Critical Path Method (CPM) chart to model the TPRM assessment workflow, mapping task dependencies via forward and backward pass to determine minimum process completion timelines.

siberX - [siberX.org](#)

Aug. 2022 – Sept. 2025

Developer

Richmond Hill, ON

- [Cybersecurity Event Scraper](#) - Built and deployed an AI-powered web scraper to collect cybersecurity event data from global sources (900+ events), parsed and structured backend data into a frontend-accessible format.
- [ODTN.News](#) - Developed and launched an immersive cyber-themed news platform simulating real-world threat landscapes to market cybersecurity conferences.

SECURITY RESEARCH

Readwise - [readwise.io](#)

- One click account takeover via CSRF
- Writeup - [blog.aliakber.ca/research/one-click-ato-csrf-email-change/](#)

Terrabot

- Reverse engineering a worm campaign
- Writeup - [blog.aliakber.ca/research/terrabot/](#)

Childsmath (McMaster University Academic Platform) - [childsmath.ca](#)

- One click account takeover via CSRF & XSS
- Writeup - [blog.aliakber.ca/tags/childsmath/](#)

8Bitjj - [8bitjj.com](#)

- Full admin takeover
- Writeup - [https://blog.aliakber.ca/research/the-dangers-of-no-code/](#)

COMPETITIONS & CTFs

International CyberSecurity Challenge 2026 - [icc.ecsc.eu](#)

Multi-day A/D & Jeopardy CTF (Brisbane, Australia)

- Represented Canada in an international cybersecurity competition among top regional national teams
- Analyzed network traffic using custom PCAP tools to identify and mitigate malicious activity
- Leveraged attacker TTPs to develop and execute counterattacks against opposing teams
- Solved OSINT challenges involving multi-source intelligence analysis

CyberSci CTF (Regionals) 2025 - [cybersecuritychallenge.ca](#)

Canadian National CTF Program (Toronto, Canada)

- 3rd nationally out of 80 university teams (2nd in Toronto regional)
- Solved advanced challenges across web exploitation, cryptography, reverse engineering, and forensics under strict time constraints.

EDUCATION

McMaster University

Sep. 2025 – July 2029

B.CompSc (Honours)

Hamilton, ON

SKILLS

Burp Suite, IDA Pro, pwntools, Ghidra, Python, C, Bash, Linux, Docker
Reverse Engineering, Binary Exploitation, Bug Bounty, Web Exploitation
